## Wellness

### Magnafield MF 2000

### Therapy Units

**Magnafield®**  
Magnetic Energy Resonance Induction Therapy

**Magnagraph®** DATA COLLECTION SYSTEM

Feel  
Good  
Again!

**Magnafield MF2000 Therapy Unit is referred internationally as a Wellness Machine:  
 Dr Bob Grace (Bs 08 8344 6609 or 1800 355 593 if in Australia, for international +61 8 8344 6609)  
 Ask for Natasha Lokteff or Avenel Grace. [www.magnacare.com.au](http://www.magnacare.com.au)**

**[Magnacare Pty Ltd](http://www.magnacare.com.au/)**

**Magnacare** Pty Ltd is a company working in research, development, manufacture and marketing of specialised medical equipment with an emphasis on magnetic ...

**These notes are not endorsed by Magnacare or any of its officers.**

**These are notes made by John Doel in February 2004.**

Having met with Katrina Ellis, Naturopath, Iridologist, for three hours as well as having read her book, Shattering the Cancer Myth, ISBN: 1-7412-1106-9, leads me to contemplate the following:

- a. In the cancer boxing ring Katrina is the Mohammed Ali of this world (that guy didn't loose often either).
- b. She is totally open and relaxed in her own personality.
- c. She is clearly benefiting patients across the full spectrum of cancers and other serious encounters.
- d. She chattered about a client she left to come to see us. This lady had been diagnosed with Lymph Cancer some seven years ago and had most of her nodes removed. Three to four months ago 8 tumours were found in this lady's liver. Old Xrays also said is was there seven years ago - and was missed. To me that would have been a visit to the one way travel agency. On this Tuesday the lady was recounting her visit to her medical specialist, the prior week, who reviewed scans of all her organs and was clearly expecting that they would also be all riddled. In the end he congratulated himself and his team on the wonderful work done. The lady then informed him that she did not accept or receive any treatment from him or his team. All tumours had gone except one which had reduced to 8mm in diameter.
- e. These stories went on and on.
- f. I got the impression that there was and has been few negative results for a number of years.
- g. I also get the feeling that she is a champion but still an apprentice. There is a lot more to come.
- h. Her capabilities are about to expand on an exponential scale - this was also strongly supported by Gregory Sheehy who was with us during this meeting.
- i. Her underlying focus is on identifying the cause of the problem or cancer be it emotional or physical or both. She basically says if she cannot identify the cause then she has trouble in treating.

- j. She is skilled in two forms of iridology and this is possibly a contributing factor for her enormous diagnostic powers. She also employs the Magnagraph.
- k. You can just feel enormous confidence coming from her in being able to help folks in this crisis situation.
- l. She previously ran a half hour weekly television show in Thailand for two years. As she says, if you are passionate about the subject and confident - it comes through to the audience - and success for the show. She is very comfortable in front of TV cameras.
- m. My feeling is that she will gravitate to being a 'trainer of trainers'.
- o. Katrina has followed Basil Wainwright's website and holds him in the highest respect. Basil Wainwright also works on the molecular structure of the blood cell to deal with disease.
- p. Dr Bob Grace is like a father figure to Katrina.
- q. The Magnafield MF2000 and the Magnagraph units developed by **Dr Bob (Bs 08 8344 6609 or 1800 355 593, for international calls 61 8 8344 6609)** are essentially elements in her treatment programs ([www.magnacare.com.au](http://www.magnacare.com.au)).  
**Ask for Natasha Lokteff or Avenel Grace.**

Chatted with **Dr Bob Grace** last night (Feb 2004): Bob Grace has a degree in Natural Health Sciences and Doctor on Philosophy – Complimentary and Alternative Medicine – Trinity College campus of University of Oxford.

1. For the last 8 or 9 years when a cancer patient has come to him with news of weeks to live - even as little as 1 week - he has asked that they tell him where they want to go on holidays within Australia in 6 months time. In their presence he has rang his travel agent and booked the airline flight. **All tickets have been claimed.**
2. With the aid of the Magnagraph, which is more accurate than an ECG unit, he has been more able to assess the patients conditions. Katrina Ellis also always uses the Magnagraph - even when she was in Thailand.
3. If the patient can lift his/her spirit, use the Magnafield MF2000 and follow the nutritional programs then Dr Bob expects the patient to be cancer free within 3 to 6 months.
4. Even skin cancers are stopped. He feels that removal of skin cancers surgically results in the problems going into the body and surfaces elsewhere.
5. In fact, many cancers can be arrested - including the most aggressive leukaemia. He had one such patient very recently, now clear.
6. Continuing with the use of the Magnafield MF2000 keeps the patient clear of cancer. Observations now extend out to 15 years.

It may be possible that anyone that follows the necessary regime can be effectively treated as long as the condition has not progressed to the point where organs are collapsing.

Even in the early stages of organ collapse he has had success.

NOTE:

The Magnafield does not treat any disease or cure anything.

The technology works at the cell level to get the body back to normal.

The body then produces good cells and slowly eliminates bad cells.

The Magnafield MF2000 is a WELLNESS MACHINE.

It creates a wellness environment where in disease cannot proliferate.

The Magnafield increases the oxygen level in every cell. Cancer is anaerobic – it cannot live with oxygen.

It is for this that the unit is an enormous aid in dealing with **Cancer** as well as **Diabetes, Multiple Sclerosis (MS)**, and what ever else.

**Magnafield units are registered with the TGA (Therapeutic Goods Administration - Australia) and FDA (Food & Drugs Administration - USA)**

The number of prominent people using the Magnafield MF2000 reads like a who's who.

The work to have the technology fully supported by the Australian Health Authorities (Government) is ongoing – this must eventually be achieved.

## MAGNETIC THERAPIES

Biologically, every cell in our body is an electromagnetic phenomenon.

There are two basic classes of magnets or magnetic fields, and several sub types. Permanent or 'static' magnets have been used since 850 BC, that is, for more than 2,850 years. The earth has its own magnetic system. The source is in the molten core that generates earth energies and fields on and above the surface between the Magnetic North and South poles. The density is around 0.5 Gauss and oscillating around 9.6 Hz (Hertz is cycles per second) to 10.5 Hz.

Lower power magnets, associated with movement such as the blood circulating or muscles moving under where the magnet is placed, have been shown to induce micro electric currents that can balance body energies and may also stimulate the iron content of the haemoglobin in the blood to transport oxygen more efficiently.

Electromagnetic energy is a most important part of biological systems. We are at the cell level, electro-chemical-magnetic beings. The DNA in every cell has its own electromagnetic spin, which maintains its controlling functions and is in turn affected by internal and external electromagnetic fields, both good and potentially damaging.

Our body's cells are also continuously influenced by strong man-made electrostatic and high frequency electromagnetic fields (EMF), which are well outside what the body is meant to tolerate.

Many types of high frequency EMF have been implicated in immune system deterioration, and together with other factors and stress, can lead to or become involved in some forms of cancer over time.

## ELECTROMAGNETIC THERAPY as MEDICINE

At the other end of the EMF scale is the use of the extremely low frequency, low power, and specific type waveform electromagnetic energy, as in the MERIT® or Magnafield MF2000 that has been scientifically proven to be of assistance in pain relief and improved healing of damaged tissue. It is also of great benefit in all neurological conditions, to slow down and arrest the progression, and for the promotion of healing in cancer.

The true essence of energy is vibration. What is now officially known as 'bioenergetic medicine' used to be called 'vibrational medicine' until a few years ago. It is now accepted that at certain very specific selected frequencies, or vibrations, rogue cells including cancer cells can be destroyed, or their reproduction (mitosis) inhibited, while usually leaving normal cells unchanged.

Healing after operations is also greatly improved. Inhibition from any further cancer cell growth is a major benefit for many.

For the best results, the system should be used before, during, and after any procedures or aggressive treatments, along with a balanced and sensible nutrition program for the individual. There is immense healing potential with the appropriate low frequency, low strength electromagnetic energy at the correct level and wave form. It has been shown to be completely safe for over 20 years.

Many hundreds of seriously ill persons facing operations, chemotherapy and/or radiation treatment, who have made the decision themselves to either delay or cancel such procedures, and have used the

Magnafield® MERIT® therapy device, along with a carefully selected nutrition program, have recovered and 5, 10 or 15 years later are not only clear of any cancer, but are enjoying life to the full.

#### MAGNETIC ENERGY RESONANCE INDUCTION THERAPY – MERIT®

- ☺ MERIT magnetic energy influences many enzymatic intracellular and membrane systems, (e.g., alkaline phosphatase); and influences antigen-antibody relations;
- ☺ MERIT magnetic energy also modifies the permeability of the cellular membrane and therefore the Ionic equilibrium. The sodium / potassium pump balance is stimulated. SpO2 is increased.

The new revolution in medicine is in the area of bio-magnetism and magnetic induction therapy. The difference between electrotherapy and magnetic induction therapy is that electrotherapy uses contact with or through the skin, whereas magnetic induction therapy does not have to touch the person, making it completely non-invasive. The magnetic energy passes through the body and almost everything else.

#### PERMANENT OR STATIC MAGNETS

Permanent magnets, many of these do work for some of the people, some of the time, for a few hours or until the body accommodates or adapts to the constant energy at or very close to the magnet. Many swear by them. The placebo effect is very real, and accounts for up to 35% of perceived benefits.

Pulsed magnetic therapy is far better than continuous, but there are several factors that must be considered in order for the real benefits to be available. Just to pulse at a frequency may not be the right method in many cases.

#### OSCILLATING MAGNETIC THERAPY

This involves an energy field that is oscillating back and forth in positive and negative modes, biased towards more negative. The waveform must be close to that of the human body. Sinusoidal, sawtooth, or square waveforms are not common to the body, but were developed for communications, radio, TV and computers, and are usually filtered to remove the ‘hash’ or harmonics that interrupt a clear signal. Medical researchers found that the body needs and uses these harmonics.

There also must be a correct ON-OFF ratio for each pulse, and there must be a period of time for the treatment followed by at least a similar period of time of rest or ‘pause’ before the subsequent treatment. Ideally, the treatment using the Magnafield system involves placing an applicator pad on the floor under the bed and leaving it operating 24 hours a day, seven days a week. Many have done this without removing or turning it off for more than 15 years. The greatest benefits are received during the sleeping hours. There are no contraindications.

It is also good for those aches and pains that annoy many people who do not want to rely on pharmaceutical drugs with their side effects.

Some of the functions and benefits from this therapy include:

- Healthy cells have different EMF characteristics and DNA /RNA spirals from cancer cells. Under the influence of 0.5Hz Magnafield treatments cancerous cells are inhibited from division

or 'mitosis', they just unravel and die off, and are dealt with and removed by the body, as are all other dead cells.

- At 0.5Hz and particularly at 2Hz the Thymus is stimulated to produce more "T" killer and helper cells, to assist and build up the immune system defences. This is a balancing system, it does not over-stimulate.
- Analgesic effects (pain relief) are best at 0.5Hz to 4 Hz.
- Tissue healing is initiated first at 0.5Hz, and then at 2Hz or 4 Hz, followed by using 8 Hz until healed.
- DNA synthesis is enhanced at 5Hz. Also cellular signalling, repair and health.
- Inflammation is reduced at 0.5Hz, swelling and oedema reduced at 3Hz.
- Peripheral circulation is helped initially at 15Hz, but maintained best at 12Hz.
- Joint mobility is improved at 0.5Hz initially, and then at 4Hz, 8Hz and 12Hz using the 'Auto Cyclic' function.
- Liver function may be assisted at 10Hz. Also a neutralising or energy balancing frequency.
- At all frequencies there is a promotion of nutrient and oxygen transport and uptake into the cells.
- Calcium, potassium and sodium balance may be restored, essential for normal cell function and health.
- Acid / alkaline pH balance assisted, and helps to reduce excessive acid conditions, and much more.

Many with cancer and those who have beaten cancer use the Magnafield as part of their cancer-fighting program with great success. Firstly, it seems to have halted the spread of cancer cells. Secondly, it has enhanced the immune system to help fight any remaining cancerous cells. Also, the patient's energy levels have improved dramatically and the oxygen and nutrient acceptance has increased, allowing for a faster healing process.

With this corrective form of treatment, using the proven frequencies, waveforms, and low intensity magnetic energy resonant induction therapy, inhibition of cancer cells has been noted and proved for over 15 years, but still not accepted in most orthodox establishments!
