# HEALTH DOME

- If you were to say that one practice or solution stands out above and beyond all others at the pinnacle of the **Health Dome** then that would be:
- **Love and Forgiveness.**

**“All dis-ease is mind generated, and all healing is generated by the love energy of one’s soul.”**

- **The errors / soul condition manifests illness. The lower ones level of consciousness then the more prevalent will be illness. Below the levels of 200, the ego dominates, however, as you raise your level of consciousness and achieve a level of 500 or higher, you start to transcend the ego. Above the level of 600, all healing is possible.**

## Cell

Cells are the basic units of the human body. Every adult body contains more than a hundred million cells. The shape, size and structure of cells vary according to their functions within the body.

# PASCAS CARE

Humanities possible evolution from a Carbon based DNA to a Crystalline DNA is resulting in profound developments at an astonishing rate.

# PASCAS CARE

- The challenge now confronting us is to integrate the monumental cellular changes occurring within every being on the planet with the reality of everyday living and health.
- Health techniques that are feeling-based will produce often-instantaneous results.
- Vibration medicine will replace the traditional techniques in present practice.
- Light body health sciences are evolving.

# PASCAS CARE

- Technical schooling will come to serve as a footnote to an emerging population of our beings gifted with healing abilities they oftentimes do not understand.
- These folks will teach the techniques of purification to beings presently coming into form in far more complex physical bodies.
- The purification of one's physical form is the single most significant activity you may choose to focus your energies.

# PASCAS CARE

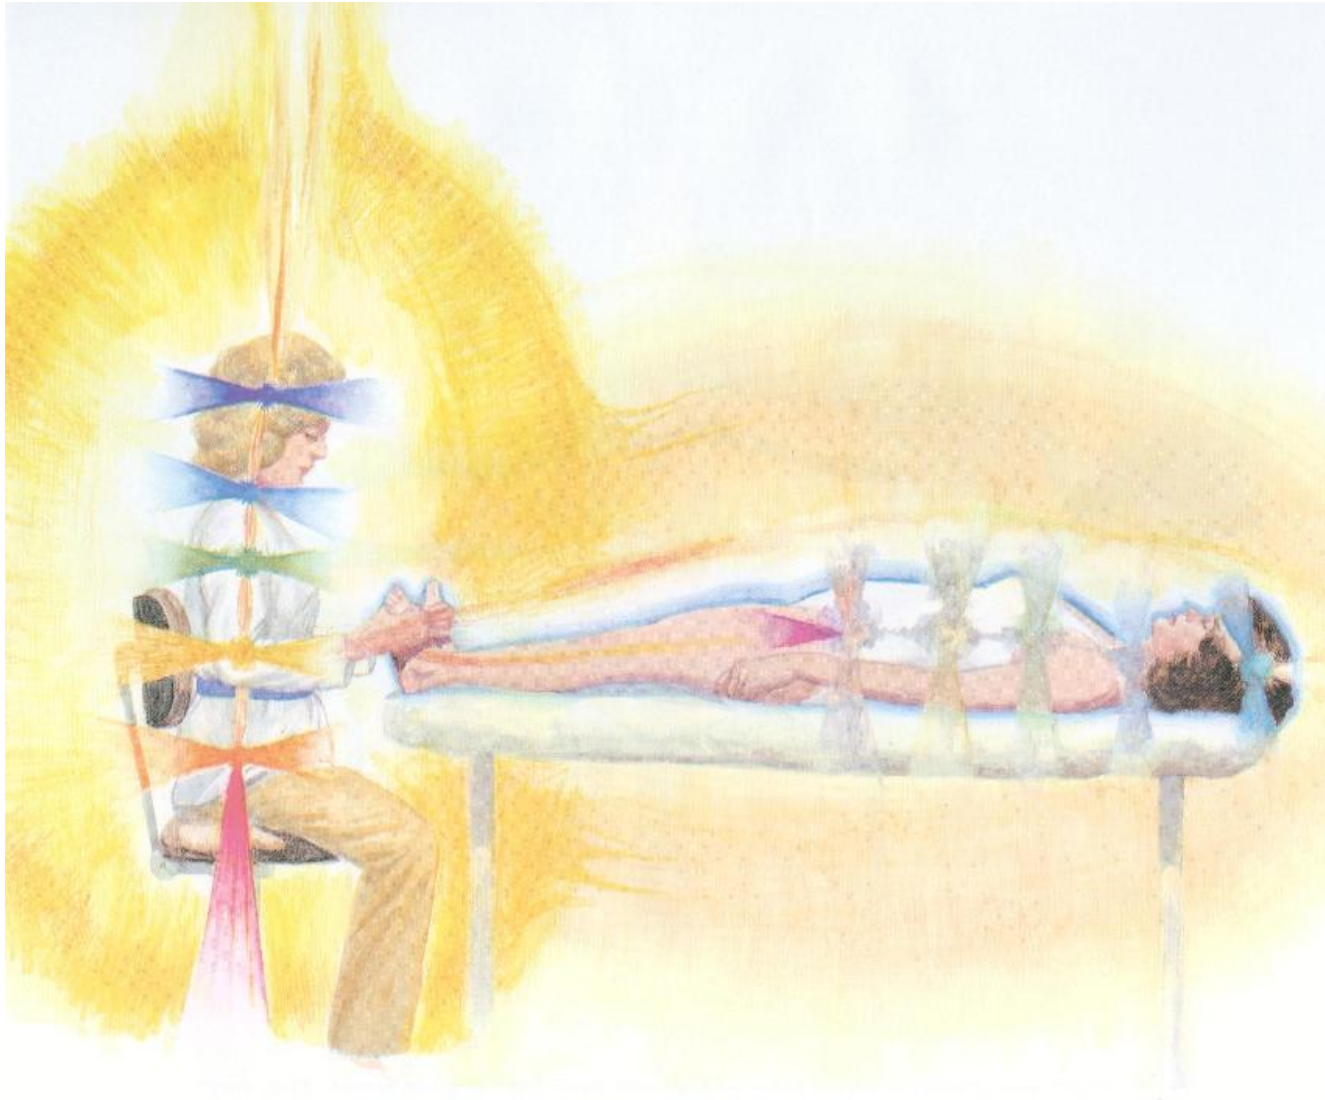

- The use of herbal medicines as practiced by certain indigenous cultures may have the effect of accelerating the cleansing process.
- Substances whose sole purpose is to **mask** symptoms and provide a false sense of well-being are counter productive and are therefore potentially dangerous.
- Correlation between one's thoughts and emotions **is** a predeterminant to the state of one's physical health.

# PASCAS CARE

- Vibrational / energy therapy is able to address “predisposition” to certain states of being.
- That predisposition is carried forth in one’s cellular structure and manifests when accumulated vibrational toxins reach levels that result in physical symptoms.
- An individual carries residual emotional baggage, imprinted in the cellular structure.
- Raising one’s vibration / consciousness, can do much to alleviate conditions that one was predisposed to manifest.
