

AUSTRALIA – TSUNAMI during POLE SHIFT / EARTH ROTATION REVERSAL!

A pole shift is cyclically occurring between 12,000 years and 13,000 years apart with the last having unfolded a little more than 12,000 years ago. The last pole shift also coincided with a Sun nova event which is when the Sun sheds its dust shell thus showering one side of the Earth with tektites (solid matter around the size of eggs of all sizes). This occurs when the Earth has ceased its rotation for a very short period before it commences rotation in the opposite direction. The heat from the Sun following a Sun nova event evaporates around 400 feet from the oceans filling the atmosphere with moisture that takes hundreds of years to return to the surface. The far side from the Sun snap freezes in accordance with Boyles Law.

Meanwhile the oceans may have reduced their speed by about half before the Earth ceases rotation bringing about mass tsunami events. The next event will result in the Indian Ocean sweeping across Australia to the Great Dividing Range on its eastern side. When rotation begins to resume in the opposite direction there will be a return sloshing event as you observe in a bath tub.

The last pole shift would have seen the east coast of Australia inundated. The Sun nova event may have taken around a 1,000 years for heat to begin to build to its present level, thus the ice age would have been extreme. Sun nova events appear to unfold around 150 million years apart, or is it 100,000 years apart, whereas pole shifts / Earth's rotation reversals occur around 12,500 years apart. Next event will be mild compared to the last pole shift! No Sun nova event!

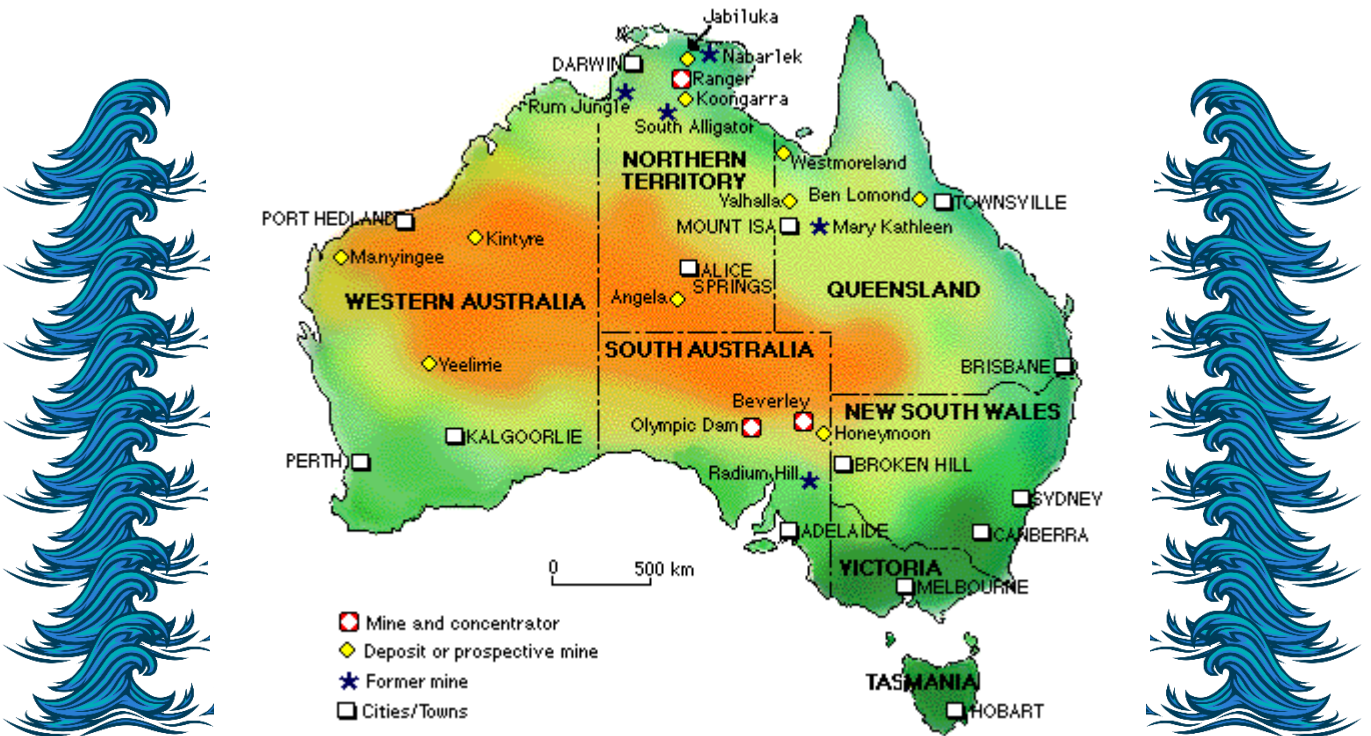

Ocean movement may reduce to around half prior to a total stopping of Earth's rotation, however the ongoing momentum of the oceans creates massive tsunamis worldwide, then there is the backwashing effect and still huge amounts of ocean moisture transferred to the atmosphere.

EARTH ROTATING EAST:
1,000 mph / 1,600 kph

PLANE FLYING WEST:
575 mph / 925 kph

The next pole shift / reversal of the rotation of the Earth will result in the Indian Ocean impeding across Australia all the way from the western coastline all the way to the Great Dividing Range on Australia's eastern coastline. Then backwash will encroach upon all eastern coastline cities.

These events cyclically unfold every 12,000 to 13,000 years apart.

NOTE: USA's moon landings (July 1969 – December 1972) were six events which amongst other research, involved the collecting and bringing back to Earth of tektite rocks being evidence of the last Sun nova event of around 12,500 years ago.

Fortunately, Sun nova events appear to be much more widely spaced apart than pole reversals. As we look back on the timing of worldwide major catastrophes we see intervals of 12,500 years occurring.

Evidence of the Sun nova event is found in the tektite shower deposits as well as the snap frozen woolly mammoths.

Nothing much to worry about – the next event is some time away!

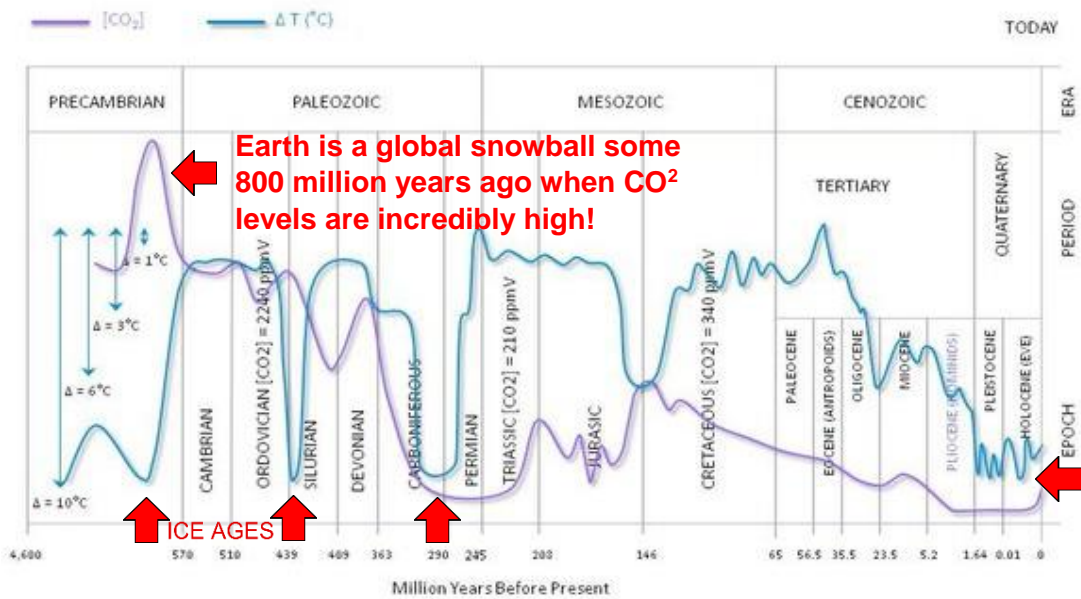

For 400,000 years temperature rose and fell in 100,000 year cycles.

How do you think climate change will affect coastal storm flooding in the future?

<https://www.quora.com/>

Paul Noel

16 June 2023

Climate Change is a delusional mythology. Now let's be clear the climate of Earth has always been changing for a very long time. I mean eons upon eons! It is entirely natural and there have always been storms and coastal flooding. So seeing a flood or a storm proves absolutely nothing.

New Real Climate Science

<https://www.quora.com/>

8 June 2023

How do you think climate change will impact natural disasters and extreme weather conditions, and what can we do to prepare for it?

So far increases in CO² seem to have resulted in dramatic decreases in climate-related deaths. If only we can keep increasing CO² perhaps we can get such deaths down to zero.

**Further, surface temperatures and conditions are continually change on all planets!
The planets have one thing in common – the Sun – the Sun does it all!**

Do you think global warming and climate change will drastically change the appearance of our planet within the next one hundred to two hundred years?

Paul Noel 3 May 2023

<https://www.quora.com/>

No, because all you are hearing at this time is a press amplified computer induced hallucination. It has no reality. From December 1978 to January 2023 the temperature change of the earth was -0.15°C . To be blunt that is statistical noise. All of the topic of "Climate Crisis" and "Global Warming" is just propaganda.

CO_2 does not control the climate. The earth has been as high as 1% CO_2 and life on Earth thrived and the planet didn't over heat. There are no tipping points! Simply state all you are hearing is projections of garbage in garbage out computer programs amplified by lying press. It is nothing but a Computer Induced Hallucination. A grand DELUSION.

Now the climate of earth does change from time to time. In the best data sets we have available Earth warmed dramatically about 11,000 years ago. It warmed to about 5°C higher than it is now and pretty much stayed there until recently. Right now the temperature is COLDER than the last 10,000 years. There is no emergency. BUT this having been said no person can predict exactly the climate in 100 or 200 years.

HIGHER CO² LEVELS are CRITICAL for FOOD PRODUCTION

How long do you think Earth has before all life goes extinct, due to either humans or natural causes (asteroid, global warming)?

<https://www.quora.com/How-long-do-you-think-Earth-has-before-all-life-goes-extinct-due-to-either-humans-or-natural-causes-asteroid-global-warming>

11 June 2023

It really depends on how soon CARBON SEQUESTRATION efforts can reduce atmospheric CO² from 400ppm to 200ppm and cause a chain reaction of extinctions.

Long term levels of CO² in the atmosphere have been typically 1% (10,000 ppm).

CO² levels would need to increase 25 fold to reach that level – and still be low!

CO² levels presently are dangerously low and present worldwide famine potential!

CO² levels approaching 0.100% appear to be optimum for global food security!

Farm Greenhouses

Level in a room of people

CO² has recently increased only from 340ppm to 420ppm, a long way off 1,000ppm!

Throughout the first quarter of the 21st century (2000 – 2025), humanity has been hell bent on its self-destruction by endeavouring to lower the atmospheric CO² levels, should they have fallen to the low levels as noted above, worldwide famine would have unfolded!

Science is confused and frequently in error due to dependence upon mind-centricity.

Why are the positive effects of global warming not being mentioned?

<https://www.quora.com/>

Ken Towe: former Senior Scientist at Smithsonian Institution (1964–1996)

14 June 2023

Since pre-industrial time the small amount of warming that has taken place and the release of CO² for our energy needs has combined to turn the Earth greener as seen from NASA satellites. That's a positive for agriculture, especially in the poorer parts of the world. It is rarely mentioned in the media because it doesn't fit the narrative of a catastrophic future unless we remove all of the energy that gets us to zero emissions by 2050.

From a quarter to half of Earth's vegetated lands has shown significant greening over the last 35 years largely due to rising levels of atmospheric carbon dioxide, according to a new study published in the journal *Nature Climate Change* on 25 April 2016. The greening represents an increase in leaves on plants and trees equivalent in area to two times the continental United States. Research results showed that carbon dioxide fertilisation explains 70% of the greening effect

The increase of CO² in the atmosphere from about 320 ppm (0.032%) to 420 ppm (0.042%) has raised the efficiency of our crops and trees by about 300%. Worldwide famine is avoided! Further, CO² does not warm up the Earth, it cools it slightly (increased vegetation). CO² is beneficial to life! It is the basis of life. CO² is not a contributing to global warming. CO² is no danger. Life on Earth has recovered greatly because of our releasing CO² into the atmosphere (even if it is only a tiny fraction!).

Note: The farming region around West Wyalong, central New South Wales, Australia, was reporting regularly wheat crop yields at 10 bags per acre in the 1960s whereas now in the 2020s the yields are regularly 28 bags per acre! This being equivalent to a very substantial increase. I, John, grew up in this farming district.

EARTH'S CARBON CYCLE

GT = GIGATONS OF CARBON

To consider that humanity's carbon footprint is driving climate change is absurd.

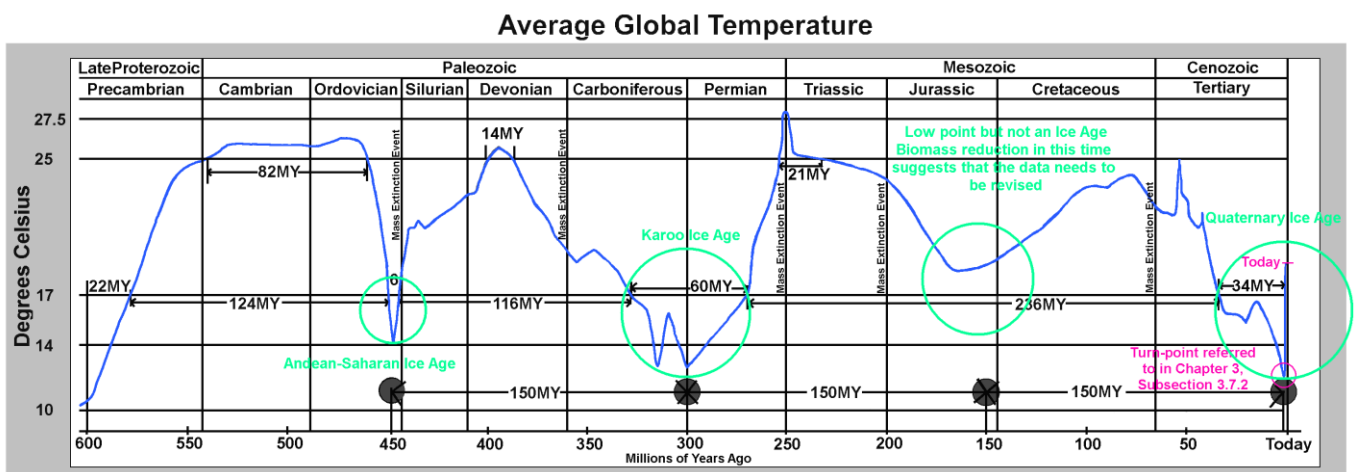

There is NO correlation between atmospheric CO₂ and global temperatures!

The stationary side facing the Sun during a Sun nova event receives tremendous heat, whilst the reverse side snap freezes. Massive amounts of water evaporate out of the oceans into the atmosphere. Heat from the Sun and moisture in the air may take more than a thousand years to normalise. Sun nova events may be 150 million years apart or just 100,000 years apart.

And a massive drop in global temperature is brought on by a Sun nova event:

Extreme Earth Events

Global Warming:

28 September 2011

James: Verna, is there really global warming, or is it something that seems to be happening but is it being made up by certain people. I think I've asked you this question before –

That doesn't matter James, I'm happy to answer it again.

Verna, a Nature Spirit: Yes, global warming is real, but it's not happening solely because of humanity's impact on the world. Humanity is only minimally affecting it, the world for the most part being able to absorb all you do that results in global warming, however it's the Earth itself that is heating up, internally and because of external influences. And these will continue as I've told you. But all humanity does in regards to global warming will be of no account because of the overall changes that are going to take place.

Monday, 17 December 2018

James: Hi Nanna Beth, I feel like a chat, is that all right with you?

Nanna Beth – 3rd Celestial Heaven: Also you might like to know, the Earth itself is starting to change its rotation speed and is slightly moving on its axis, thereby causing shifts in surface weather patterns as warming and cooling takes effect, just happening in different places than how it has been. And these changes are coming from the core that's being affected by greater space changes. There is always massive pressures and forces affecting every part of natural creation, so the world and all space and all that's within it. And as David (Montaigne) points out, observers have observed that things remain the same, at least seem to be the same, although with minute incremental changes, all of which culminate to periodic, large swift changes. And so humanity is coming into a time of rapid change, and on all levels, not just the physical or spiritual. Of which I still can't say more.

So the debate about global warming or cooling will continue with both being right, as both are occurring. And in some areas they are affecting each other, in other areas they are happening independent of each other.

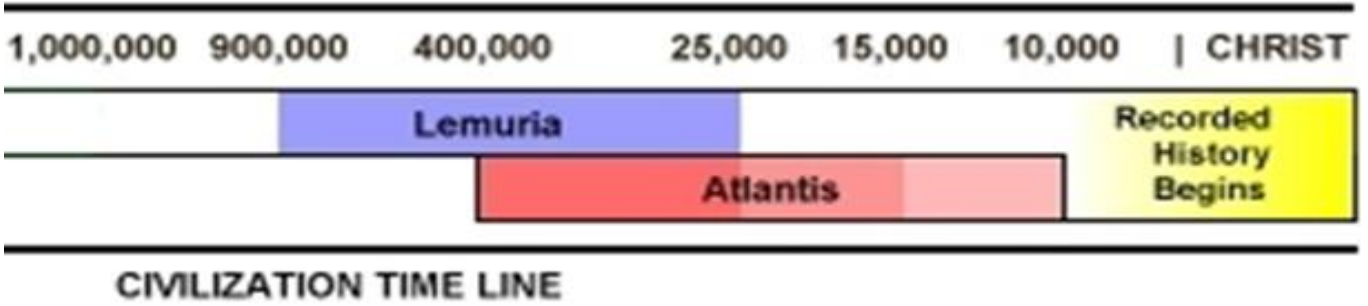

James: Thank you Nanna Beth, you've covered all I was wanting you to update.

NOTE: Since the beginning of the ending of the Rebellion and Default commenced on 31 January 2018, communications with our invisible friends from much higher levels than previously allowed will progressively increase with those who open themselves to aspiring to live Feelings First!

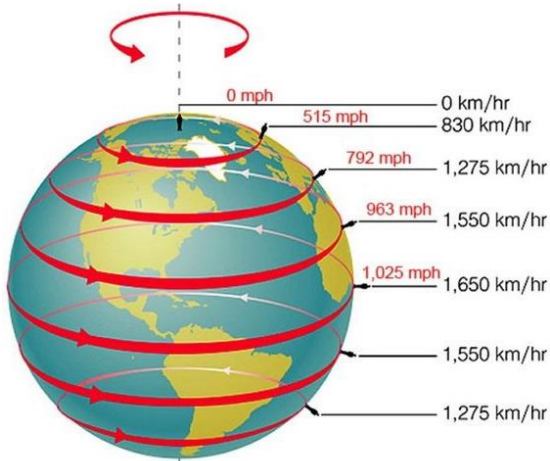

Here is a thought! Should those who are immersing themselves in research of historical significance AND are also embracing Living Feelings First, longing for the truth and understanding of what they are feeling, then could they be assisted with access to the museum at Jerusem?

GEOPHYSICAL POLE SHIFTS appears to take place every 12,000 to 13,000 years!

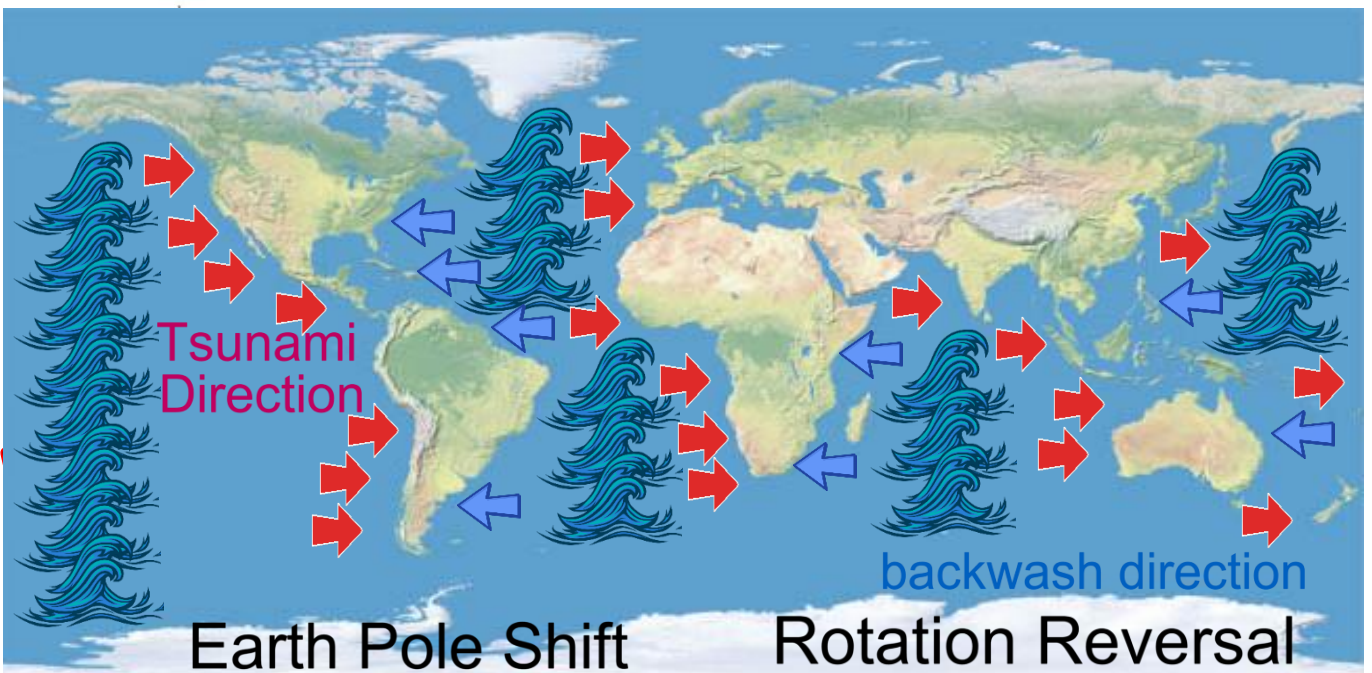

50,000 years ago and earlier Laschamp reversal at regular intervals!
 37,500 Lemuria submergence
 25,000 Atlantis frozen over
 12,500 New Atlantis submerged
 NOW! Unfolding

This is a Pole Shift scenario:

The rotation of the Earth will slow progressively preceding a rapid stopping and then pole shift reversal followed by a reversal of the rotation of Earth resuming in the opposite direction. The oceans will have significant momentum to inundate vast areas of landmass followed by a backwashing event.

MUSEUM of JERUSEM – 1st Celestial Heaven

Note previously from Nanna Beth, 3rd Celestial Heaven – 20 November 2017 – relating to a ‘museum’ at Jerusem on the 1st Celestial Heaven: “And as far as concerning where The First Parents are now, they have moved on with the old guard, having been released from such duties that being The First Parents required. You can see and even in a sense ‘meet’ with them when you come into the first Celestial sphere, we have a museum sort of arrangement, it is a massive and highly complex and covers every aspect of humanity’s history on Earth and in the Mansion Worlds. And you can sort of interact with the exhibits – if I can crudely call them that. You literally walk into say the Atlantean times and explore using your mind for whatever aspect of such times you care to. You can even in a sort of holographic way meet with people from those times, speak with them in a sense, although it’s all automated, it’s not the real person who is now a spirit, although the whole experience being so real and amazing makes your mind believe it is the real person or spirit. So we can even talk to Mary and Jesus like this, which a lot of Celestials do when they first arrive, it all helping them to get to know them better and know what they were all about. It’s a massive learning centre and contains all the knowledge of humanity’s experience, so anything and everything is kept there like ‘living’ archives.” (Thus you can see all of history is recorded and can be researched and studied.)

For example: Others believe they have transcribed messages from Jesus but that is not so, that is not Jesus from Nazareth of the Bible but typically a Jesus from the Celestial Heavens who is fully versed through researching and engaging in the very amazing museum at Jerusem on the 1st Celestial Heaven. Other Celestials with names akin to the Apostles of Jesus have from time to time done the same thing.

First parents are Andon and Fonta (Aman and Amon) who lived 993,500 years ago – not Adam and Eve who came to Earth 38,000 years ago.

Akashic Records

HOW DID THIS ERRONEOUS and HARMFUL PROPAGANDA ORIGINATE?

Series 4, Part 6J, Adam and Eve Story by Chen Thomas CIA Disinformation

https://www.youtube.com/watch?v=cZkq_bCQmfk

<https://www.youtube.com/watch?v=ajp9Xr5n6cg>

Diehold Foundation published this YouTube on 12 & 17 June 2023

<https://dieholdfoundation.com/>

The alternative reality of what is causing global warming as well as what causes cataclysms, this being introduced by Chan Thomas with the false premise of carbon dioxide (CO²) as being the driver of global warming, while he was working with the USA agency of the CIA (Central Intelligence Agency). Through an act of Congress, being the Central Intelligence Agency Act 1949, encapsulating the Education Partnership Agreement, “improvement of education in science, technology, engineering, arts and mathematics”, which enables CIA to impose its programs of disinformation, as well as their own agendas and propaganda upon the people of USA through the education system as well as the media. However, Wallace S Broecker tried to give credence to the idea that CO² is causing global warming (Journal Science 8 August 1975). Broecker is really the father of global warming.

NOW we are to benefit through the abundance of CO²!
